EDUCATION

Computer Science Student

Michigan Technological University

4.0 GPA

Expected Graduation: May 2026

SKILLS

Programming languages:

- Java
- Python
- R & SAS
- C & C++

Professional Skills:

- Research
- Client Relations
- Project Management

Technical Skills

- CAD - Computer Aided Design
- Data Analysis

ACTIVITIES

Enterprise: IGS (1yr)

Innovative Global Solutions

- Developed code for low cost infant incubator in C++
- Worked in a team to develop electrical system

First Robotics: FRC (4yrs)

- Acted as team captain and programming lead
- Developed robot code in Java
- Created a functioning autonomous mode

PROFESSIONAL SUMMARY

Ambitious Computer Science Student with a diverse and broad range of experiences, and a proven track record in both practical and formal educational environments. Excited to leverage these skills and experiences to contribute to a forward-thinking software company, driving impactful projects and fostering continuous improvement.

WORK EXPERIENCE

Phase 1 Engineering - Engineering Consulting Co.

Product Development and Software

Development Intern - 2024

April 2024 - August 2024

- Created several internal tools in Python saving dozens of hours
- Developed tools for data manipulation and parsing for clients
- Worked with digital filtering system in a in-home radar application
- Simultaneously managed diverse projects for several clients
- Developed and performed rigorous tests to ensure customer design requirements

Product Development Intern - 2023

June 2023 - August 2023

- Performed extensive research on technologies for products
- Participated in idea generation for intellectual property
- Worked to create new technologies to give client competitive edge
- Communicated with clients over product development direction
- Created prototypes of new products using 3d printing and simulation

Engineering Lab Assistant

February 2023 - June 2023

- Performed research on legal regulations and viable technological solutions
- Tested simulation software against real world measurements
- Created and performed complex electromagnetic simulations

Sandy Point Beach House

Prep Cook

June 2022 - March 2023

- Assessed daily needs
- Utilized self direction

Dishwasher

May 2021 - September 2021

- Ensured a certain level of quality
- Particular attention to detail
